Forecast for Wednesday 10 Nov 2021

Weather: A cloudy start with an area of generally light rain, mainly focused across western and southern ranges. Gradually from mid-morning a mix of only isolated light showers between limited brighter spells will feed erratically southwards, but the chance of patchy light rain will persist across far southern peaks such as Cadair Idris and Aran Fawddwy, through the rest of the day.

Chance of cloud free mountain/hill tops above 800m: 10% at first becoming from mid-day 60%

Visibility: Becoming moderate in rain and briefly in later showers, also very poor in hill fog with bases quite widespread down to 500m in early rain, infrequently lowering later as showers push through.

Meteorologist's View

Difficult navigation conditions most widespread at first with quite extensive hill fog coupled with rain.

Forecast for Thursday 11 Nov 2021

Weather: Mainly cloudy with occasional drizzly showers, these focused across western peaks, but increasing chance of dry and bright conditions developing later in the day

Maximum wind: Variable 15mph or less, becoming southeast 15-20mph by early evening with gusts reaching 35mph across most exposed ridges and summits.

Chance of cloud free mountain/hill tops above 800m: 60% becoming 80% late in the day

Visibility: Generally good or very good, becoming moderate or poor in showers and very poor in hill fog with bases occasionally lowering 500m, particularly around showers.

Temperature: **Valleys:** Plus 5 Celsius increasing 13 Celsius during the afternoon
At 800m: Plus 5
Freezing level: Above all summits
